

Environmental Impact Report 2023

Materials Reused

121,259

pounds of materials

126,311

total items

Environmental Impact*

The energy saved through recovering these materials is equivalent to:

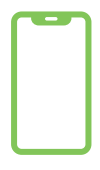

597.08

metric tons of CO₂E

2.07

billion BTUs

This emissions reduction is equivalent to...

Charging 76.2 million phones

Switching to 22,703 LEDs

Taking 129 vehicles off the road

* Greenhouse gas emissions and energy savings were estimated using US EPA's Waste Reduction Model (WARM) and US EPA's Gas Equivalencies Calculator.
